	Preferred	Preferred	Supported	Supported	Preferred
---	-----------	-----------	-----------	-----------	-----------

Supported –	The Receiver currently supports the standard but does not necessarily require support from its partners
Preferred –	The Receiver will accept data or information using the standard or legacy methods but prefers that partners use the standard
Required –	Partners must support the standard no other method is supported by the Receiver
Development –	The Receiver has plans in place to support the standard and a project is active. No current timeline for active support
No Plans –	The Receiver has no plans to support the particular standard
N/A –	Does not apply to the Receiver
